Daily Projection Report · April 28, 2026 · Sample Report

HOW TO READ THE NUMBERS

PROJ — our model's projected stat value for that player in this game. **LINE** — the sportsbook's posted prop line we're comparing against. **DIR** — whether we project the player to go OVER or UNDER that line. **PROB** — our model's estimated probability the pick hits, based on thousands of similar matchups. **EDGE** — how far PROB sits above the 50% coin-flip breakeven (Edge = Probability – 50%); the bigger the edge, the stronger we like the play. Every pick below cleared our primary threshold — the numbers are the same math the model runs every single day, not cherry-picked after the fact.
